Bone Anchored Hearing Aids	3		2		3	8
Grand Total	523	198	553	291	185	1,750

PLEASE NOTE: There is currently no activity/cost data for the following additional treatments: Autologous Cartilage Implantation, Spinal cord stimulation and Ceasarean section for non-clinical reasons. In the former two treatments this is because there is little or no activity. In the latter it is because there are >200 primary diagnoses associated with C-section, and we will be investigating this further in early 2011.

Activity figures are for 2010/11 up to month 7 only
