SUBJECT: DECARBONISATION POLICY MONITORING – PROGRESS UPDATE

1. Synopsis

1.1 This report discusses progress to date on the agreed monitoring plan on our decarbonisation policy and for Members to review the plan.

2. Recommendation

2.1 To note the progress to date

2.2 To review the monitoring plan on our decarbonisation policy

3. Background

3.1 The Committee believes that Environmental, Social and Governance (“ESG”) risks should be taken into account on an ongoing basis and are an integral part of the Fund’s strategy and objective of being a long-term investor.

3.2 Progress to date

3.2.1 Members agreed a decarbonisation policy as part of its Investment strategy statement and sets targets to achieve further decarbonisation across its entire investment assets. The policy defines their beliefs and take account of sustainable opportunities, and agree a monitoring regime and progress measurement.

The agreed targets are as follows:

The Fund seeks to achieve the following targets by May 2022 through:

1) Reducing future emissions by focussing on absolute potential emissions (tons of CO₂e), a reserves based measure that focusses on emissions that could be generated if the proven and probable fossil fuel reserves owned by the companies in the portfolio were burned, in the public equity allocation by more than three quarters compared to the exposure at June 2016, the date of the Fund's latest carbon foot-printing exercise.

2) Reducing "exposure to carbon intensive companies" as measured by Weighted Average Carbon Intensity, an indicator of current climate-related risks facilitating comparison across asset classes and across industry sectors in the public equity allocation by more than half compared to the exposure at June 2016, the date of the Fund's latest carbon foot printing exercise.

3) Investing at least 15% per cent of the Fund in sustainability-themed investment - for example in climate change mitigation, low carbon technology, social housing, sustainable infrastructure, energy efficiency and other opportunities.

Measures agreed to monitor and guide decarbonisation and allocation to sustainability include:

1) The Fund adopting TCFD supplemental guidance for asset owners where applicable.

2) The Fund reviewing targets annually.

3.) The Fund forming a view on decarbonisation of all asset classes beyond public equities by 2022 and will develop mechanisms to evaluate the progress.

4) The Fund monitoring ESG (including climate change) risks annually and set targets to mitigate these risks. Monitoring will include annual analysis of the carbon footprint of the Fund's portfolio, as well as conducting a periodic scenario analysis based on multiple climate change scenarios ranging from 2°C to 4°C.

3.2.2 Investing at least 15% per cent of the Fund in sustainability-themed investment

In December 2018, as part of the Fund's 10% asset allocation to infrastructure, a renewable infrastructure manager –Quinbrook, was appointed as one of the Fund's infrastructure manager with a 4% commitment.

In August 2019, a global equity mandate with Allianz on the LCIV platform was transferred to a sustainable- themed manager RBC also on the LCIV platform. This allocation is around 9% of the Fund.

3.2.3 Measuring carbon footprint of equities portfolio annually

The carbon footprint measure comprises of two elements; future emissions that is reserve based, and exposure to carbon intensive companies. The results as at 31 March 2019 was not finalised because of differences in measurement methodology of a new service provider making comparison and as such accurate reduction percentages less meaningful. As asset valuations for 31March 2020 are now available a new procurement to measure the carbon footprint is being designed so it can be reported at the next meeting.

3.2.4 Climate scenario analysis in December 2019

Members explored how the total investment portfolio, individual asset classes and industry sectors for global equities are impacted by three climate scenarios (global heating scenarios of 2°C, 3°C and 4°C applied over different time horizons (10 years, 2050, 2100). A stress

approach outlined the potential climate-related price impact. Recommendations noted included:

- (i) *Investment beliefs*: continue to review investment beliefs and strategic narrative to take account new climate change opportunities.
- (ii) *Investment policy*: review Islington's fund policies at least annually and refine belief on climate change if required, report of the Fund's progress to meet adopted metric and targets and continue to communicate Islington's climate leadership.
- (iii) *Investment process*: continue to integrate climate change considerations into investment decision making and manager selection.

3.3 Members are asked to note progress to date and review the monitoring plan for a detailed report to be prepared for the next meeting if required.

4. Implications

4.1 Financial implications

4.1.1 The cost of providing independent investment advice and transition cost is part of fund management and administration fees charged to the pension fund.

4.2 Legal Implications

The LGPS (Management and Investment of Funds) Regulation 2016, Regulation 7 (1) requires an administering authority to formulate an investment strategy which must be in accordance with the guidance issued by the Secretary of State. The ISS must include:

The authority's policy on how social environmental or corporate governance considerations are taken into account in the selection, non-selection, retention and realisation of investments

The Sub-Committee holds a key fiduciary responsibility to manage the Fund's investments in the best interests of the beneficiary members and the council taxpayers, where the primary focus must be on generating an optimum risk adjusted return. It is vital that any investment decisions or strategies developed, such as a carbon strategy, must not negatively influence this primary responsibility.

The precise choice of investments can be influenced by ethical and environmental, social and governance (ESG) considerations, so long as that does not risk material financial detriment to the fund. Whilst deliberating on such issues, Queen's Counsel (Nigel Giffin) advice, commissioned by the LGPS Scheme Advisory Board and published in 2014, states that the administering authority may not prefer its own specific interests to those of other scheme employers, and should not seek to impose its particular views where those views would not be widely shared by scheme employers and members (nor may other scheme employers impose their views upon the administering authority).

4.3 Environmental Implications and contribution to achieving a net zero carbon Islington by 2030:

Environmental implications will be included in each report to the Pensions-sub committee as necessary. The current agreed investment strategy statement for pensions outlines the policies and targets set to April 2022 to reduce the current and future carbon exposure by 50% and 75% respectively compared to when it was measured in 2016 and also invest 15% of the fund in green opportunities. 4.4 **Resident Impact Assessment**

None applicable to this report. The council must, in the exercise of its functions, have due regard to the need to eliminate discrimination, harassment and victimisation, and to advance equality of opportunity, and foster good relations, between those who share a relevant protected characteristic and those who do not share it (section 149 Equality Act 2010). The council has a duty to have due regard to the need to remove or minimise disadvantages, take steps to meet needs, in particular steps to take account of disabled persons' disabilities, and encourage people to participate in public life. The council must have due regard to the need to tackle prejudice and promote understanding

- 4.4.1 An equalities impact assessment has not been conducted because this report is seeking opinions on an existing policy document and therefore no specific equality implications arising from this report.

5. **Conclusion and reasons for recommendation**

- 5.1 Members are asked to note the progress to date and review the monitoring plan.
