

Recordable Decision Summary Notice

Recordable decision taken by the Director of Digital Services

ICT Parking Software Services (2223-0271)

Date of decision	28 May 2024
Description of decision taken	Decision to approve the extension of the existing Taranto traffic management software contract for 1-year in line with the terms and conditions of the G-Cloud 13 framework.
Reasons for decision	<p>The contract for the Council's traffic management and enforcement software – Taranto expires 28 May 2024. The terms of the contract under G-Cloud 13 framework allow for a 1-year extension.</p> <p>The Council needs an IT system for traffic management and enforcement to provide automated end-to-end notice processing in line with statutory legislation requirements. The current software enables the Council to manage various aspects of traffic and parking operations. These include parking penalty charge notices, licensing support and maintenance, automatic number plate recognition, handheld device licenses etc.</p> <p>The value of the original 12-month period was £244,768.88. The value of the 1-year extension is £247,857.78. Bringing the overall contract value to £492,626.66.</p>
Other options considered	A new contract was considered but given the value and complexity this was not deemed feasible to complete before the current contract expired.

Any conflict of interest declared by an Executive member consulted	None.
Details of any dispensation granted to the member by the Standards Committee	N/A.
